
IMS Fundamentals

Duration: 3 Days **Course Code: CM01G** **Delivery Method: Virtual Learning**

Overview:

This course introduces the basic facilities of IMS Database and Data Communications.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Users who want a basic understanding of the IMS Database and Data Communications and data processing personnel who will be working with an IMS system.

Objectives:

- Understand the major components of the IMS database system
 - Understand the processing of an IMS database record
 - Match the DBD and PSB control blocks
 - Contrast the requirements and effects of sequential versus direct access to databases
 - Understand the reasons for use of secondary indexes and logical relationships
 - Compare full function with fast path database organisations
 - Understand the basic functions of IMS data communications
 - Identify the roles of messages, queues and logical terminal names
 - Distinguish among the scheduling characteristics of the IMS/TM region types: Message Processing programs, Batch Message Processing programs, and Interactive Fast Path programs
 - Identify the major activities involved in recovery and restart
 - Understand the impact of a conversational program
 - Describe the functions of additional IMS product features including DBRC, IRLM for data sharing, distributed processing and DBCTL for CICS.
-

Prerequisites:

Basic understanding of data processing including operating systems, access methods and job control language.
