
IMS Database Recovery Control (DBRC)

Duration: 5 Days Course Code: CM20G

Overview:

Learn all aspects, including installation, implementation, and management of the Database Recovery Control (DBRC) feature of Information Management System (IMS). DBRC is an IMS facility that provides database recovery, and facilitates database sharing, between IMS systems in all IMS environments including DB/TM, Data Base Control (DBCTL), and Batch. Reinforce the concepts and skills you have learned with machine labs.

Target Audience:

This is an advanced course for IMS system programmers, Data Base Administrators (DBA) and technical support individuals who need to understand DBRC installation, customization, administration and maintenance in an IMS System.

Objectives:

- | | |
|--|--|
| ■ Install, implement, and manage the DBRC (DataBase Recovery Control) component of IMS (Information Management System) | ■ |
| ■ | ■ Register full-function, Fast Path, HALDB, and non-recoverable databases, and their data sets |
| ■ Identify and list the basic elements of DBRC | ■ |
| ■ | ■ Define and register Database Data Set Groups, Data Groups, and Recovery Groups |
| ■ Describe the processing of DBRC records | ■ |
| ■ | ■ Define and register change accumulation groups |
| ■ Describe the data sharing environment | ■ |
| ■ | ■ Describe installation tasks for DBRC and RECON (REcovery CONTROL) data sets |
| ■ Describe the subsystem interaction and database authorization process | |
-

Prerequisites:

You should have completed:

- IMS Fundamentals (CM010)
- or IMS Fundamentals - Web - ILO (CMW01)
- or have equivalent knowledge

You should also have a minimum of 12 months system programming or database administration experience with IMS databases.

Content:

- DBRC Implementation
- Database Registration
- Recording Log Information
- Data Sharing
- Subsystem Authorization
- GENJCL (GENerate JCL)
- Utilities
- RECON Maintenance and Recovery
- Security

- DBRC Implementation
- Database Registration
- Recording Log Information
- Data Sharing
- Subsystem Authorization
- GENJCL (GENerate JCL)
- Utilities
- RECON Maintenance and Recovery
- Security

- DBRC Implementation
- Database Registration
- Recording Log Information
- Data Sharing
- Subsystem Authorization
- GENJCL (GENerate JCL)
- Utilities
- RECON Maintenance and Recovery
- Security

- DBRC Implementation
