

DASA DevOps Enable and Scale – Including Exam

Duration: 2 Days Course Code: DASADEV-PES Version: 1.0 Delivery Method: Virtual Learning

Overview:

Scale DevOps practices across teams and organizations. The DASA DevOps Enable and Scale Certification equips you with the skills, mindset, and behaviors to foster high-performing teams, enable end-to-end collaboration, and remove organizational barriers—allowing you to accelerate value delivery at scale.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Individuals involved in IT development, IT operations, or IT service management
Individuals whose roles are affected by DevOps and continuous delivery, such as:

- DevOps engineers
- Product owners
- Integration specialists
- Operations managers
- Incident and change managers
- Network Leads
- Business managers
- Automation architects
- Enterprise architects

Objectives:

- After completing this program, you will be able to:
- Explain the importance of **DevOps culture** and the aspects that can influence it.
- Explain why courage, team building, leadership, and continuous improvement are required in a DevOps environment.
- Explain why courage is **essential to enable** trust, honesty, and experimentation.
- Identify and evaluate **different types of behavior** in a DevOps environment.
- Recognize the signals indicating impediments and/or team dysfunctions.
- Describe how to form good DevOps teams.
- List the effects of happiness and motivation on **team performance**.
- Assess the maturity of DevOps teams.
- Identify how leaders **encourage feedback and transparency**.
- Discuss the factors that leaders can influence to build trust.
- Explain how and why leaders promote a **“Safe to fail” environment**.
- Analyze value streams to improve throughput and flow.
- Facilitate the tools for **continuous improvement**: structured problem-solving workshops, Story Mapping sessions, and retrospectives.
