

EC-Council Certified Security Specialist (E|CSS) + Exam voucher

Duration: 5 Days **Course Code: ECSS** **Delivery Method: Virtual Learning**

Overview:

EC-Council Certified Security Specialist (ECSS) allows students to enhance their skills in three different areas namely information security, network security, and computer forensics. EC-Council Certified Security Specialist (ECSS) is an entry level security program covering the fundamental concepts of information security, computer forensics, and network security. It enables students to identify information security threats which reflect on the security posture of the organization and implement general security controls. This program will give a holistic overview of the key components of information security, computer forensics, and network security. This program provides a solid fundamental knowledge required for a career in information security.

Target Audience:

This course will benefit students who are interested in learning the fundamentals of information security, network security, and computer forensics.

Objectives:

- Key issues plaguing the information security, network security, and computer forensics
- Fundamentals of networks and various components of the OSI and TCP/IP model
- Various network security protocols
- Various types of information security threats and attacks, and their countermeasures
- Social engineering techniques, identify theft, and social engineering countermeasures
- Different stages of hacking cycle
- Identification, authentication, and authorization concepts
- Different types of cryptography ciphers, Public Key Infrastructure (PKI), cryptography attacks, and cryptanalysis tools
- Fundamentals of firewall, techniques for bypassing firewall, and firewall technologies such as Bastion Host, DMZ, Proxy Servers, Network Address Translation, Virtual Private Network, and Honeypot
- Fundamentals of IDS and IDS evasion techniques
- Data backup techniques and VPN security

Testing and Certification

Content:

- | | | |
|---|-----------------------------------|---|
| ■ Information Security Fundamentals | ■ Intrusion Detection System | ■ Digital evidence |
| ■ Networking Fundamentals | ■ Data Backup | ■ Understanding File Systems |
| ■ Secure Network Protocols | ■ Virtual Private Network | ■ Windows forensics |
| ■ Information Security Threats and Attacks | ■ Wireless Network Security | ■ Network Forensics and Investigating Network Traffic |
| ■ Social Engineering | ■ Web Security | ■ Steganography |
| ■ Identification, Authentication, and Authorization | ■ Ethical Hacking and Pen Testing | ■ Analyzing logs |
| ■ Cryptography | ■ Incident response | ■ E-mail Crime and Computer Forensics |
| ■ Firewalls | ■ Computer Forensics Fundamentals | ■ Writing Investigative Report |
