

FCP FortiAnalyzer Analyst

Duration: 1 Day Course Code: ENFCPAN Delivery Method: Virtual Learning

Overview:

In this course, you will learn the fundamentals of using FortiAnalyzer for centralized logging. You will also learn how to identify current and potential threats through log analysis. Finally, you will examine the management of events, incidents, reports, and task automation with playbooks. These skills will provide you with a solid foundation for becoming a SOC analyst in an environment using Fortinet products.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Objectives:

- **After completing this course, you should be able to:**
- · Understand basic FortiAnalyzer concepts and features
 - · Describe the purpose of collecting and storing logs
 - · View and search for logs in Log View and FortiView
 - · Understand SOC features
 - · Manage events and event handlers
