FCSS SD-WAN

Duration: 4 Days **Course Code: ENFCSSSDWAN** **Delivery Method: Company Event**

Overview:

In this course, you will learn about common SD-WAN deployment scenarios using the Fortinet Secure SD-WAN solution. You will explore different situations, from a single enterprise site to multiple data center environments, that will help you to enhance and troubleshoot SD-WAN deployments.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Objectives:

- **After completing this course, you should be able to:**

- · Describe the capabilities of the Fortinet Secure SD-WAN solution

- · Deploy FortiOS SD-WAN solutions with FortiManager and FortiAnalyzer

- · Configure basic SD-WAN features

- · Configure advanced SD-WAN features

- · Understand the SD-WAN route and rule lookup process

- · Understand the different rule criteria and strategies available to steer traffic using SD-WAN and how SD-WAN responds to changing link conditions

- · Deploy SD-WAN using basic IPsec and routing configuration

- · Deploy SD-WAN using advanced IPsec and routing configuration

- · Troubleshoot SD-WAN routing and rule matching issues

Testing and Certification

- ■

Content:

Agenda:

1. Introduction

2. Centralized Management

3. Members, Zones, and Performance SLAs

4. Routing and Sessions

5. Rules

6. SD-WAN Overlay Design and Best Practices

7. Monitoring and Troubleshooting
