

Quality Management with SAP Extended Warehouse Management

Duration: 2 Days **Course Code: EWM140** **Delivery Method: Virtual Learning**

Overview:

QM uses the Quality Inspection Engine (QIE) to map inspection processes in Extended Warehouse Management (EWM). The EWM inspection processes include: Inspection for the goods receipt, inspections in the warehouse, and inspections for returns.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Application Consultant
- Business Analyst
- Program / Project Manager
- System Architect

Objectives:

- After completing this course, you will be able to articulate the process of QM within SAP EWM, including how it integrates with the Quality Inspection Engine. This training will enable you to clearly define the QM for EWM process steps required for your organization's implementation project.

Prerequisites:

Essential

- EWM100
