

## SSCP-Systems Security Certified Practitioner - Certification Preparation

Duration: 5 Days    Course Code: GK1642    Delivery Method: Company Event

### Overview:

**New - Learn to implement, monitor and administer IT infrastructure in accordance with information security policies to prepare for the SSCP certification.**

The best way to combat an attack on an organizations information assets is to have qualified information security professionals with the appropriate practices and controls to implement, monitor and administer IT infrastructure to ensure data confidentiality, integrity and availability. This SSCP certification prep course validates students ability to identify, evaluate, and prioritize potential threats, manage and mitigate threats through risk management concepts, assessment activities, and monitoring terminology, techniques and systems.

Gain skills to properly and promptly respond to a security incident or forensic investigation with incident handling processes and procedures such as Business Continuity Planning (BCP) and Disaster Recovery Planning (DRP).

This updated edition covers the SSCP exam objectives effective as of November 2021. Much of the new and more advanced knowledge expected of an SSCP is now covered in a new chapter "Cross-Domain Challenges." If you're an information security professional or student of cybersecurity looking to tackle one or more of the seven domains of the SSCP, this course gets you prepared to pass the exam and enter the information security workforce with confidence.

### Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

### Target Audience:

Network security engineer Security administrator Security analyst Systems engineer Network administrator Systems administrator Security specialist Systems/network analyst Security consultant Database administrator

### Objectives:

- In-depth coverage of the seven domains required to pass the SSCP exam:
- Security Operations and Administration
- Access Controls
- Risk Identification, Monitoring, and Analysis
- Incident Response and Recovery
- Cryptography
- Network and Communications Security
- Systems and Application Security

### Prerequisites:

- Systems administration experience
- Familiarity with TCP/IP
- An understanding of UNIX, Linux, and Windows
- Intermediate-level knowledge of network security concepts
- G005 - CompTIA Network+

### Testing and Certification

- (ISC)2 SSCP System Security Certified Practitioner

### Follow-on-Courses:

- CISSP Certification Prep Course
- CISM - Certified Information Security Manager Prep Course

## Content:

- Chapter 1: The Business Case for Decision Assurance and Information Security
  - Chapter 2: Information Security Fundamentals
  - Chapter 3: Integrated Information Risk Management
  - Chapter 4: Operationalizing Risk Mitigation
  - Chapter 5: Communications and Network Security
  - Chapter 6: Identity and Access Control
  - Chapter 7: Cryptography
  - Chapter 8: Hardware and Systems Security
  - Chapter 9: Applications, Data, and Cloud Security
  - Chapter 10: Incident Response and Recovery
  - Chapter 11: Business Continuity via Information Security and People Power
  - Chapter 12: Cross-Domain Challenges
-
