IBM Spectrum Scale Basic Administration for Linux

Duration: 3 Days   Course Code: H005G   Delivery Method: Virtual Learning

Overview:

GPFS System Administration is intended for IT professionals tasked with administering a GPFS system. This course includes information on installing, configuring and monitoring a GPFS cluster. Many features are described and tested in hands on lab activities including: Storage management, High availability options, cluster management and information lifecycle management (ILM) tools.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

System administrators and technical personnel wanting to learn GPFS.

Objectives:

- After completing this course, you should be able to:Present an overview on GPFS Install and configure GPFS Describe the GPFS clusterDetail the ILM toolsDescribe High availabilityManage and monitor GPFSTroubleshoot and recover GPFSDescribe cNFSSet up a GPFS multi-clusterDescribe Active file managementDescribe GPFS native RAID

Prerequisites:

-

Content:

GPFS system administration introductionInstallation and basic configurationThe GPFS clusterILM toolsHigh availabilityManagement and monitoringTuning, troubleshooting and recoveryClustered NFSMulti-clusterActive managementFile placement optimizerGPFS native RAID
