

ABAP® Programming for SAP HANA®

Duration: 3 Days **Course Code: HA400** **Delivery Method: Virtual Learning**

Overview:

In this course, you learn how you can use SAP HANA and new features in the ABAP programming language to optimize existing ABAP code and to develop innovative ABAP applications to enhance your business.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Application Consultant
 - Developer
 - Development Consultant
-

Objectives:

- This course will prepare you to:
 - develop and optimize ABAP applications that access data stored in the SAP HANA database
 - develop more concise and well-performing ABAP programs using new features of the ABAP programming language
-

Prerequisites:

Essential

- Basic Knowledge of SAP HANA
- S4D400 Basic ABAP Programming
- Experience in ABAP Programming, esp. Open SQL (joins, views, aggregations)

Recommended

- The HA100 course provides a good understanding of SAP HANA and it is highly recommended for participants who want to attend this course
 - HA150
-

Content:

Introduction

- Understanding SAP HANA and how it impacts the ABAP development paradigm
- Introduction to ABAP development tools (also known as ABAP in Eclipse)

Taking ABAP to SAP HANA

- Accessing SAP HANA as a secondary database
- Tools to detect potential functional and performance issues when migrating to SAP HANA: code inspector and ABAP test cockpit, ABAP trace and ABAP profiler, SQL trace
- Tools to prioritize performance issues: SQL monitor, SQL performance tuning worklist
- Performance rules and guidelines for ABAP in the context of SAP HANA

Database independent code-to-data

- Enhanced open SQL
- Defining advanced views using core data services (CDS) and CDS associations in ABAP
- Incorporating authorization checks with CDS in ABAP

SAP HANA specific code-to-data

- Using native SQL and ABAP data base connectivity (ADBC)
- Creating, using and debugging ABAP managed database procedures
- Using SAP HANA information models in ABAP

Advanced topics

- ABAP transport of SAP HANA objects (HTC and HTA)
- Using SAP HANA full text search in ABAP
- Enabling input fields for type-ahead search
- SAP list viewer (ALV) optimized for SAP HANA

Additional Information:

Course based on software release SAP HANA 2.0 SPS06

Notes This course is for developers and consultants who are familiar with programming database access using ABAP and ABAP objects programming and want to learn how to use SAP HANA to speed up such access. The course covers many new ABAP features for database access that are not limited to SAP HANA as underlying database.
