

Managing HPE GreenLake for Block Storage MP

Duration: 3 Days Course Code: H40ZSS

Overview:

The Managing HPE GreenLake for Block Storage MP course describes the HPE Alletra Storage MP hardware platform building blocks, theory of operation and HPE GreenLake for Block Storage features. Using hands-on labs (HOL), students learn how to perform common day-to-day management tasks, including how to create hosts, volumes, sets, and how to monitor the product. This course also provides knowledge of more advanced features, including local and remote replication, disaster recovery, as well as maintenance and data migration. You gain a practical understanding of HPE GreenLake for Block Storage MP capabilities using extensive lab exercises, performed on all applicable user interfaces

Target Audience:

This course is ideal for customers, administrators, and channel partner sales or technical sales.

Objectives:

- After completing this course, you should be able to:
 - • Describe HPE Alletra Storage MP hardware and features
 - • List and compare HPE GreenLake for Block Storage MP management options, roles, and security
 - • Explain provisioning terminology
 - • Perform on-boarding and initialization
 - • Work with volumes, hosts, and corresponding sets
- • Protect data with snapshots, clones, and use protection policies
- • Explain different types of replication implementations and failure scenarios
- • Briefly describe data migration, high availability, and disaster tolerance solutions
- • Describe monitoring and alerting options
- • Describe the HPE GreenLake for Block Storage MP OS update procedure, maintenance

Prerequisites:

Before attending this course, you should have:

-
-
-
-

Content:
