

Managing HPE Alletra 9000

Duration: 2.5 Days **Course Code: H61N3S**

Overview:

The Managing HPE Alletra 9000 course describes the HPE Alletra 9000 portfolio hardware building blocks, theory of operation and features. Using hands-on labs (HOL), students learn to perform common day-to-day management tasks, including how to create hosts, volumes, and sets, as well as how to monitor the product. This course also provides knowledge of more advanced features, including local and remote replication, disaster recovery, QoS, as well as maintenance and data migration. You gain a practical understanding of HPE Alletra 9000 array capabilities using extensive hands-on lab exercises, performed on all applicable user interfaces.

Target Audience:

Customers, administrators and channel partner sales or technical sales

Objectives:

- Course objectives
- After completing this course, you should be able to:
 - • Describe HPE Alletra 9000 hardware and features
 - • List and compare HPE Alletra 9000 management options, roles, and security
 - • Explain provisioning terminology
 - • Perform HPE Alletra 9000 array on-boarding and initialization
 - • Work with volumes, hosts, and corresponding sets
 - • Protect data with snapshots, clones, and use protection policies
- protection policies
- • Describe priority optimization and quality of service (QoS)
- • Explain different types of Remote Copy implementations and failure scenarios
- • Briefly describe data migration, high availability, and disaster tolerance solutions
- • Describe HPE Alletra monitoring and alerting options including HPE InfoSight
- • Describe the HPE Alletra 9000 OS update procedure, maintenance, and data migration options

Prerequisites:

- An understanding of general storage concepts including fiber channel, iSCSI technology and RAID
- Operator level functionality in a Windows environment
