

HPE BladeSystem Administration

Duration: 3 Days Course Code: HE646S

Overview:

This course provides instruction on HPE BladeSystem administration and management. The portfolio overview ensures an understanding of components, configurations, and solutions. The course also covers resources and administration related to retired HPE c-Class BladeSystem products.

Target Audience:

System administrators, engineers and consultants who install, manage, and monitor the HPE BladeSystem c-Class environment

Objectives:

- After completing this module, students should
- be able to:
- • Explain the functional architecture of the HPE BladeSystem c-Class environment
- • Identify the management infrastructure (Insight Display, Onboard Administrator)
- • Review the HPE BladeSystem c-Class retired portfolio and equipment capabilities
- • Review system requirements for power and cooling
- • Identify high-level functionalities of HPE ProLiant Generation 10 Plus (Gen10+) servers
- • Describe the HPE BladeSystem c-Class interconnect module architecture
- • Explain the HPE Virtual Connect management tools (Virtual Connect Manager, HPE OneView)
- • Show familiarity with HPE BladeSystem scripting
- • Explain how to update the firmware on an HPE BladeSystem

Prerequisites:

HPE recommends that students complete the
