

## Managing HPE 3PAR StoreServ I Management and local replication

**Duration: 3 Days    Course Code: HK902S    Delivery Method: Virtual Learning**

### Overview:

The Managing HPE 3PAR StoreServ I course is designed for the new or entry-level HPE 3PAR administrator. The goal of the class is to acquaint the 3PAR administrator with the most common day-to-day tasks and best practices associated with administration of the 3PAR array. The levels of provisioning storage are emphasized. This training reflects the newest release of the HPE StoreServ Management Console. The course is approximately 50% lecture and 50% hands-on labs using HPE 3PAR arrays. NOTE: Hosts used in the lab environment are MS Windows.

#### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

### Target Audience:

This course is intended for StoreEasy customers, HPE Services field engineers, call center personnel, Presales and Channel Partners and other field personnel who provide installation and/or operational support assistance for HPE StoreEasy and 3PAR StoreServ File Controller Servers

### Objectives:

- After completing this course, the student
- should be able to:
  - • Explain the HPE 3PAR current hardware offerings: 20000 series, 8000 series, and 7000 series
  - • Explain the numbering schemes for the HPE 3PAR hardware components: controllers, ports, and physical disks
  - • Use the StoreServ Management Console (SSMC) GUI and the CLI to perform administrative tasks
  - • Create and work with a Common Provisioning Group (CPG)
  - • Administer Virtual Volumes using the SSMC and the CLI
  - • Understand the advantages of Thin Provisioning and create a Thin Provisioned
  - • Understand the advantages of Dedup and Compression for storage allocated from SSDs
  - • Export and un-export virtual volumes from hosts
  - • Use HPE 3PARinfo to analyze luns presented to hosts
  - • Use Host Explorer to simplify addition of hosts
  - • Use Host Sets and Volume Sets to simplify provisioning storage
  - • Create a Snapshot and promote (restore) from a Snapshot
  - • Create a Clone and promote a Clone
  - • Convert a Virtual Volume (i.e. from fully provisioned to thin provisioned or thin provisioned to thin dedup or vice versa)
  - • Use the SSMC reporting feature to monitor

■ Virtual Volume (TPVV)

■ capacity and performanc

■ Course data sheet

---

### Prerequisites:

- An understanding of general storage
- 
- Operator level functionality in a Windows
-
