Transforming to a Cisco Intent Based Network

Duration: 180 Days Course Code: IBNTRN Version: 1.1 Delivery Method: Elearning (Self-paced)

Overview:

The Transforming to a Cisco Intent-Based Network (IBNTRN) course teaches you how the functionality of Cisco® SD-Access fits into Cisco Digital Network Architecture (Cisco DNATM). Through a combination of lessons and hands-on learning, you will practice operating, managing, and integrating Cisco DNA Center, programmable network infrastructure, and Cisco SD-Access fundamentals. You will learn how Cisco delivers intent-based networking across the campus, branch, WAN, and extended enterprise and ensures that your network is operating as intended.

This course is worth 40 Continuing Education Credits

e-Learning

Interactive self-paced content that provides flexibility in terms of pace, place and time to suit individuals and organisations. These resources also consist of online books, educational podcasts and vodcasts, and video-based learning.

Target Audience:

Individuals who are looking to leverage the functionality of Cisco DNA Center to streamline operations, reduce costs, detect and contain threats, and continuously align the network to business needs

Objectives:

- After completing this course, you should be able to:
- Identify the Cisco Digital Network Architecture solution by describing the vision, strategy, general concepts, and components.
- Describe the Cisco DNA Center design application, hierarchical network design, and basic network settings, and describe the integration of Cisco DNA Center with Cisco Identity Services Engine (Cisco ISE) for Automation and Assurance.
- Describe the Cisco DNA Center Inventory and the available mechanisms for discovering and adding network devices, and explore the device compatibility with Cisco DNA Center and SD-Access.
- Describe the Cisco DNA Center automation features such as configuration templates, software image maintenance, and Plug and Play (PnP) device onboarding.
- Explore the Cisco DNA Center user interface, the available workflows for onboarding devices, and how to design and manage a network.

- Introduce Cisco SD-Access, describe the different node types in the fabric and the two-level segmentation provided by the solution, and take a deep dive into the control and data plane protocols used in Cisco SD-Access.
- Describe the Cisco DNA Center workflow for deploying Cisco SD-Access, defining all the prerequisite network settings and profiles, defining the required policies, creating fabric domains and sites, and provisioning fabric nodes.
- Create and manage fabric domains and sites, provision fabric devices, and onboard your endpoints in a single site or distributed fabric campus network.
- Describe the features available for automating and monitoring wireless networks with Cisco DNA Center, and describe the available deployment models with their benefits and limitations, such as wireless Over-the-Top (OTT) and SD-Access Wireless.
- Describe the Cisco SD-Access Extension for IoT solution, its architecture and components, and the benefits and limitations of the solution
- Describe the use cases and migration scenarios for migrating users from traditional campus to SD

Prerequisites:

Testing and Certification

Attendees should meet the following prerequisites:

Recommended as preparation for the following exam:

Experience with Cisco Unified Wireless Network technologies Experience with Cisco ISE, 802.1x, and Cisco TrustSec Understanding of segmentation technologies such as VLANs and Virtual Routing and Forwarding (VRF) Basic understanding of overlay technologies such as Virtual Extensible LAN (VXLAN) Basic understanding of Locator ID Separation Protocol (LISP). WLFNDU - Understanding Cisco Wireless Foundations ENCOR - Implementing and Operating Cisco Enterprise Network Core Technologies Content: Deploy Wired Fabric Networks with Cisco Introducing Cisco DNA Architecture Deploy SD-Access Layer 2 Borders and **DNA** Center Multicast and Integrate Cisco DNA Center with External Services or Applications Cisco DNA Center Design Cisco SD-Access for Wireless Understanding Programmable Network Cisco DNA Center Inventory Infrastructure Cisco SD-Access Extension for IoT **Cisco DNA Center Automation** Operating and Managing Cisco DNA Deploy Brownfield and Fabric Wireless Infrastructure Network with Cisco DNA Center Explore Cisco DNA Center and Automating **Network Changes** Test Drive Cisco DNA Center APIs Migrating to Cisco SD-Access Introducing Cisco Software-Defined Access Labs Cisco SD-Access Multicast Explore Cisco DNA Center and Automate Deploying Cisco Software-Defined Access **Network Changes** Integrating Cisco DNA Center Deploy Wired Fabric Networks with Cisco **DNA Center** Deploy Brownfield and Fabric Wireless Network with Cisco DNA Center Deploy SD-Access Layer 2 Borders and Multicast and Integrate Cisco DNA Center with External Services or Applications

This course is currently not aligned to an exam
