

ISO 22301 Lead Auditor (PECB certified) + exam

Duration: 4 Days Course Code: IS22301LA Version: 9.1

Overview:

Given the increasing number of disruptions and the unpredictability of disasters of any kind (natural, occupational, information security), organizations nowadays are aiming at getting certified against ISO 22301 in order to show commitment toward business continuity and ensure that disruptive incidents are detected and properly addressed, thus the management system is continually improved. By becoming a PECB certified auditor, you will achieve a formal and independent recognition of your personal competences, and you qualify yourself to conduct BCMS audits for a certification body. Recognizing the importance of an effective audit and the means used to successfully conduct it, PECB has designed the ISO 22301 Lead Auditor training course. Attending this training course allows you to obtain the knowledge and skills to plan and carry out audits in compliance with ISO 19011 and the certification process according to ISO/IEC 17021-1. Through interactive sessions, explanatory information, exercises, and questions for discussion, you will be able to acquire knowledge on the business continuity management system as well as audit techniques and become competent to perform a BCMS audit by applying widely recognized audit principles, procedures, and techniques, and to manage an audit program and an audit team. After attending the training course, you can sit for the exam and, if you successfully pass the exam, you can apply for the “PECB Certified ISO 22301 Lead Auditor” credential. The internationally recognized “PECB Certified ISO 22301 Lead Auditor” certificate will prove that you have the professional capabilities and competences to audit organizations based on the requirements of ISO 22301 and auditing best practices.

Target Audience:

Auditors seeking to perform and lead business continuity management system (BCMS) audits
Managers or consultants seeking to master the business continuity management system audit process
Individuals responsible to maintain conformity with the BCMS requirements in an organization
Technical experts seeking to prepare for the business continuity management system audit
Expert advisors in business continuity management

Objectives:

- Gain a comprehensive understanding of the concepts, approaches, methods, and techniques used for the implementation and effective management of a BCMS
- Understand the operation of the business continuity management system and its processes based on ISO 22301
- Learn how to interpret and implement the requirements of ISO 22301 in the specific context of an organization
- Acquire the necessary knowledge to support an organization in effectively planning, implementing, managing, monitoring, and continually improving a BCMS

Prerequisites:

■
