

Build custom engine agents with the Microsoft 365 Agents SDK (MS-4015)

Duration: 1 Day Course Code: M-MS4015 Delivery Method: Company Event

Overview:

Build intelligent custom engine agents using the LLMs and AI components of your choice with the Microsoft 365 SDK

In this course, you'll learn how to build intelligent custom engine agents using the LLMs and AI components of your choice with the Microsoft 365 SDK. These custom engine agents can also be used to extend Microsoft 365 Copilot. This course has been created by Microsoft as a "Bring Your Own Environment" course, allowing individuals to use their personal devices and settings. If a student wants to complete the hands-on activities, the individual must bring their own CoPilot environment. Otherwise, demonstrations and lectures will be conducted by the instructor.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Prerequisites:

- Familiarity with Teams Toolkit, Visual Studio Code, Microsoft Teams, and creating chat bots.

Content:

Module 1: Build Custom Engine Agents with the Microsoft 365 Agents SDK
