

SAP Master Data Governance: Configuration and Customizing

Duration: 3 Days **Course Code: MDG200** **Delivery Method: Virtual Learning**

Overview:

In this course, participants will gain understanding and skills related to configuration, as well as the knowledge required to extend and modify the solution. This includes the ability to create a custom solution based on the Custom master data domain. The theoretical lessons are enriched with several hands-on exercises, to deepen the practical knowledge.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Application Consultant Business Analyst Business Process Architect Business Process Owner / Team Lead / Power User Developer Development Consultant Solution Architect Super/Key/Power User

Objectives:

- This course will prepare you to:
 - Adjust and extend the standard MDG content
- Perform basic configuration of standard MDG content
 - Create custom content for MDG

Prerequisites:

MDG100 Experience in SAP Business Suite ERP or SAP S/4HANA * Experience with SAP ERP master data in Financials or MM or SD

Content:

MDG Data Quality Management

- Outline the core processes of data quality management with SAP MDG on SAP S/4HANA
- Explain master data quality: evaluations, scores, and dimensions
- Describe how machine learning has been applied in data quality management

MDG Data Quality Enhancements

- Explain search and duplicate checks
- Explain concepts of BRFplus
- Explain derivations, validations, and checks

MDG Process Modeling

- Explain workflow basics
- Explore concepts of process modeling with rule-based workflow

MDG Data Replication

- Consider data export and data import via data transfer
- Explain concepts of key and value mapping
- Explain replication usage
- Explain the configuration setup

MDG Custom Objects and MDG Extensibility

- Explore data modeling concepts
- Explain data transfer
- Configure user interfaces

MDG Customizing, Setup and Project Strategies

- Activate and configure the default processes for MDG
- Explain and use advanced customizing
- Explain the new and updated functionality that is offered with MDG
- Start first MDG projects that use the standard data models
