
OpenStack Essentials

Duration: 1 Day **Course Code: OS100** **Delivery Method: Virtual Learning**

Overview:

Are you looking at moving your legacy infrastructure and applications to the Cloud? Which Cloud software do you use? Do you need a Public Cloud or a Private Cloud? Perhaps, a Hybrid Cloud.

This course will help you answer those questions and more using OpenStack as your Cloud platform.

OpenStack uses a modularized architecture. You can start with a core set of services for IaaS and then expand to include other services as you grow. For example, when you are ready to 'containerize' your legacy applications, you can add OpenStack components to build & manage your container orchestration engine (COE) cluster, as well as the containers and pods. Other components discussed deploy bare metal machines, provide cloud billing & rating, and more.

All Mirantis OpenStack courses are vendor agnostic. Tasks are performed in an OpenStack environment without any vendor add-ons that might change the way OpenStack works. Reference implementations are utilized, such as Logical Volume Manager (LVM) for Block Storage, Open vSwitch (OVS) for L2 networking, or KVM/QEMU for the hypervisor.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Project Managers, Sales Engineers, Development Managers, Business Stakeholders, and beginning Cloud operations personnel

Follow-on-Courses:

- OS220 - OpenStack Administration & Operations
 - OS250 - OpenStack Administration Bootcamp
-

Content:

- | | | |
|-----------------------------|------------------------------------|--|
| ■ Course Introduction | ■ High-level overview of OpenStack | ■ Most commonly used components |
| ■ Introduction to Cloud | ■ History | ■ Other additional components for containers, bare metal, workflows, monitoring, cloud costing, and more |
| ■ Introduction to OpenStack | ■ OpenStack Foundation | ■ OpenStack Ecosystem ; Marketplace |
-

Additional Information:

Lab Requirements:

Laptop with WiFi connectivity Attendees should have the latest Chrome or Firefox installed, and a free account at strigo.io.
