

Cortex XDR: Investigation and Response (EDU-262)

Duration: 2 Days Course Code: PAN-EDU-262 Version: 3.6

Overview:

This instructor-led course teaches you how to use the Incidents pages of the Cortex XDR management console to investigate attacks. It explains causality chains, detectors in the Analytics Engine, alerts versus logs, log stitching, and the concepts of causality and analytics. You will learn how to analyze alerts using the Causality and Timeline Views and how to use advanced response actions, such as remediation suggestions, the EDL service, and remote script execution. Multiple modules focus on how to leverage the collected data. You will create simple search queries in one module and XDR rules in another. The course demonstrates how to use specialized investigation views to visualize artifact-related data, such as IP and Hash Views. Additionally, it provides an introduction to XDR Query Language (XQL). The course concludes with Cortex XDR external-data-collection capabilities, including the use of Cortex XDR API to receive external alerts.

Target Audience:

Cybersecurity analysts and engineers Security operations specialists

Objectives:

- Successful completion of this instructor-led course with hands-on lab activities should enable participants to:
 - Create and manage on-demand and scheduled search queries in the Query Center
- Investigate and manage incidents
 - Create and manage the Cortex XDR rules BIOC and IOC
- Describe the Cortex XDR causality and analytics concepts
 - Working with Cortex XDR assets and inventories
- Analyze alerts using the Causality and Timeline Views
 - Write XQL queries to search datasets and visualize the result sets
- Work with Cortex XDR Pro actions such as remote script execution
 - Work with Cortex XDRs external-data collection

Prerequisites:

Participants must have completed EDU-260 (Cortex XDR: Prevention and Deployment).

- PAN-EDU-260 - Palo Alto Networks: Cortex XDR 3.2:Prevention and Deployment (EDU-260)

Content:

Course Modules

1 - Cortex XDR Incidents

2 - Causality and Analytics Concepts

3 - Causality Analysis of Alerts

4 - Advanced Response Actions

5 - Building Search Queries

6 - Building XDR Rules

7 - Cortex XDR Assets

8 - Introduction to XQL

9 - External Data Collection

Additional Information:

Palo Alto Networks Education

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks, safely enable applications, and automate effective responses to security events.
