IBM Maximo Asset Management 7.5 Work Management

Duration: 3 Days   Course Code: TR632G   Delivery Method: Company Event

Overview:

This detailed course shows the key applications and functions that are specific to work order management. This course focuses on the setup, processing, and management of work management records and supporting maintenance activities. To provide a context for learning IBM Maximo procedures and processes, scenarios are provided. You change roles to perform a variety of tasks that are related to the processing and managing of work through the work order life cycle. This life cycle includes generating, planning, scheduling, assigning, dispatching, and completing.
