

## ICAgile Project And Delivery Management

Duration: 2 Days    Course Code: ICP\_APM

### Overview:

ICAgile Project And Delivery Management (ICP-APM) is one of two knowledge-based certifications on the Delivery Management track. This certification focuses on core components of agile project management as distinct from traditional project management, and on equipping course participants with strategies and techniques for successful Lean and Agile project implementation. A servant leadership mindset and approach is critical to empowering agile teams to produce great results. Students will practice the role of agile project manager as a facilitator of agile practices towards achieving desired outcomes. This certification also takes a much more in-depth look at the fundamental agile concepts of adaptive planning, customer collaboration, and value-driven delivery in dynamic and sometimes highly constrained environments. In addition, the learning outcomes address agile approaches to standard project management processes such as metrics, reporting, and contract management.

### Target Audience:

This course is ideal for traditional Project Managers who are making the transition to agile environments or agile team members interested in taking on servant leadership roles are the primary audience for this certification. Relevant roles include:

Project Managers,  
ScrumMasters,  
Business Analysts,  
Product Managers  
or other team members interested in Agile Project Management.

### Objectives:

- By the end of the course participants will be able to:
- Relate the differences between traditional and Agile approaches to project management and illustrate why Agile approaches are more applicable in uncertain environments
- Appraise a project context and identify the various factors that need to be addressed to enable Agile delivery in the specific context
- Develop appropriate metrics to improve the performance of an Agile project and illustrate how these can be communicated within and beyond the team
- Explain the value of fostering an environment of collaboration, trust, learning and self-organization and design a team formation activity to create such an environment
- Apply value management techniques, taking into account multiple stakeholder perspectives and constraints and explain how continuous feedback increases value realization
- Collaborate to produce multiple-horizon plans and estimates for real-world and hypothetical examples
- Identify the different stakeholders in a project environment and apply techniques to ensure they are engaged continuously throughout project delivery

### Prerequisites:

All are welcome to attend the course, regardless of experience. However, the following prerequisites are highly recommended:

An understanding of project management

Familiarity with Agile concepts and principles

### Testing and Certification

This course aligns with the ICAgile's Delivery Management Track. Successful completion of this course and demonstrating the required learning outcomes will enable you to gain ICP-APM Certification.

## Content:

Topics include:	Navigating Governance and Contracts	Defining Successful Delivery
Agile refresh	Empowering High Performance	Leveraging Constraints
Impact on Management	Structuring for Rapid Feedback	Adaptive Planning
Optimising the System	Identifying and Communicating Value	Monitoring and Communicating Progress

---
