Project Controlling in SAP S/4HANA Project System

Duration: 5 Days Course Code: S4123 Delivery Method: Virtual Learning

Overview:

This course introduces you to the key management accounting business processes within the SAP S/4HANA Project Control (Project System) application. Through instructor lectures and demonstrations balanced with extensive system exercises you will gain a thorough understanding of how SAP S/4HANA Project Control (Project System) can support the management of simple and complex projects within your organization. You will also learn the most important configuration settings for cost controlling and logistics projects.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.
