

Basic ABAP Programming

Duration: 4 Days **Course Code: S4D400** **Delivery Method: Virtual Learning**

Overview:

This course is an introduction to ABAP programming on any ABAP platform. The course will equip you with the basic knowledge of the development process, development tools (ABAP development tools for Eclipse), and modern expression-based and object-oriented ABAP coding that you need to write applications in ABAP. You will cover all the techniques that you need to create a simple application using the ABAP RESTful application programming model. The material from this course is essential foundation knowledge that you will need both for further ABAP programming classes and in your own self-study. This course is also available in a self-paced learning format on learning.sap.com.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Developer
- Development Consultant
- Technology Consultant

Objectives:

- This course will prepare you to:
- Learn elementary programming in ABAP

Prerequisites:

Essential

- none

Recommended

- Elementary knowledge of a modern programming language such as Java, Node.js, C# or Python

Content:

- | | | |
|---|---|--|
| ■ Working with the ABAP development environment | ■ Using ABAP SQL to access the database | ■ The ABAP RESTful application programming model |
| ■ Basic techniques in the ABAP language | ■ Simple and complex data types | |
| ■ Simple object-oriented concepts | ■ Business objects and entity manipulation language | |

Additional Information:

Course based on software release

- SAP BTP, ABAP environment 2311

Notes

- The course is held on SAP BTP, ABAP environment. However, the contents are valid for any ABAP environment.
