Performing Manual Planning with SAP Analytics Cloud

Duration: 2 Days Course Code: SACP23 Delivery Method: Virtual Learning

Overview:

This course starts with an overview of the planning process phases used in SAP Analytics Cloud for planning. The course focuses on manual planning, starting with the creation of the planning model and the setup of the planning story. Additional units focus on the core planning functionality in SAP Analytics Cloud for planning such as versions, the creation of the dimension members required for planning, data entry modes, inverse dimension formulas, and distribution of plan data using the planning panels. Auditing data, performing data validation, and implementing data locking to control data access are also part of the core learning for the course. The final unit focuses on seamless planning in SAP Analytics Cloud with SAP Datasphere.
The course material will be delivered in English.
This course is a deep-dive course. Please ensure that you have taken the SACM21 and SACS21 courses or have equivalent foundational knowledge of the overview topics covered in those courses.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Application Consultant
- Business Analyst
- Data Consultant
- Technology Consultant
- Data Analyst

Objectives:

- This course will prepare you to:
- Describe the planning process phases in SAP Analytics.
- Use the core planning features.
- Implement data locking to control data access in a model and story.
- Audit data and perform data validation.
- Perform seamless planning with SAP Datasphere

Prerequisites:

Essential

- SACM21 SAP Analytics Cloud Data Modeling or prior experience with SAP Analytics Cloud modeling

Recommended

- SACS21 SAP Analytics Cloud Story Design or prior experience with SAP Analytics Cloud story design

Content:

- Exploring the SAP Analytics Cloud Planning Process and the Main Planning Features
- Planning using SAP Analytics Cloud Planning Models and Stories
- Creating and Managing Versions
- Managing Dimensions
- Using the Data Entry Modes (Manual Planning, Mass Data Entry, Fluid Data Entry)
- Using Inverse Dimension Formulas
- Distributing Data with Planning Panels
- Using Seamless Planning with SAP Datasphere
- Auditing, Validating Data Input, and Locking Data

Additional Information:

Course based on software release SAP Analytics Cloud 2025.14 (QRC)
