

Service Integration and Management (SIAM®) Professional - Including Exam

Duration: 3 Days Course Code: SIAMP

Overview:

Service Integration and Management (SIAM®) is a methodology used to manage and seamlessly integrate multiple service providers to ensure a single business-facing IT organization. The EXIN SIAM® Professional certification tests a candidate's knowledge and skills of the activities in the four stages of the SIAM® roadmap. A candidate who successfully completes the EXIN SIAM® Professional can analyze, plan, build and inspect a multi-service provider environment.

Scope

The EXIN SIAM® Professional certification tests a candidate's knowledge of the application of SIAM® to situations and the candidate's ability to further analyze the SIAM® concepts in the following areas: The Discovery and Strategy stage The Plan and Build stage The Implement stage The Run and Improve stage SIAM® practices across the stages

Target Audience:

The target group includes, but is not limited to: Service Managers and Practitioners Service Provider Portfolio Managers Process Managers Project Managers Change Managers Service Level Managers Business Relationship Managers Program Managers Supplier Managers Service Architects Process Architects Business Change Practitioners Organizational Change Practitioners SIAM® consultants

Objectives:

- Establish a governance framework based on SIAM® practices;
- Perform an organization assessment to better determine and establish a plan and promote improvements;
- Determine the key elements to perform a SIAM® implementation;
- Design and build up a SIAM® model for different environments and organizations;
- Lead a SIAM® implementation;
- Select different approaches to implement SIAM®;
- Use organizational change management in order to boost the SIAM® implementation;
- Improve the organization's SIAM® ecosystem at every stage;
- Manage and continuously improve multiple processes based on SIAM®.

Prerequisites:

-

Testing and Certification

The fee for the exam is included.

- Examination type: Multiple-choice questions
- Number of questions: 40
- Pass mark: 65% (26/40 questions)
- Open book/notes: No
- Electronic equipment/aides permitted: No
- Exam duration: 90 minutes

Content:

1. Discovery and Strategy

- Elements of a SIAM® Governance Framework

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

choose governance approaches for monitoring and measuring service performance.

2. Plan and Build

- Design a Detailed SIAM® Model

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

- Ongoing Organizational Change Management

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

4. Run and Improve

-Analysis of the Current Situation

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

- Key Elements of a SIAM® Strategy

The candidate can...

- interpret the characteristics of governance in

- Plan a SIAM® Implementation

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

analyze the most appropriate tooling strategy and integration methods for a SIAM® ecosystem.

- Operate, Assure and Improve a SIAM® Ecosystem

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

5. SIAM®

Practices Across the Stages

- a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

describe the content of the business case and the transition project for SIAM®.

3. Implement

- Different Scenarios Supporting a SIAM® Implementation

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.

- Application of SIAM® Practices

The candidate can...

- interpret the characteristics of governance in a SIAM® ecosystem.
- differentiate SIAM® governance roles.
- analyze existing services, service groupings, service providers and the marketplace.
- explain how to assess current capability.
- classify the influences for deciding on the SIAM® model and sourcing approach.
- interpret strategic drivers for SIAM®.
- differentiate critical success factors for SIAM®.
- interpret the principles and policies for roles and responsibilities.
- select an appropriate SIAM® strategy.
- illustrate how to gain and maintain buy-in to a SIAM® strategy.
- analyze organization specific service models and process model
- select an appropriate sourcing approach and SIAM® structure.
- describe detailed roles and responsibilities.
- select a performance measurement and reporting framework.
- select a collaboration model.
- analyze contract considerations for SIAM®.
- describe the challenges for organizational change.
- differentiate between approaches for onboarding of services and service providers.
- choose between a big-bang approach and a phased approach, based on the benefits and risks of these approaches.
- explain how to transition to the approved SIAM® model.
- choose ways to influence morale and motivation.
- analyze structural elements at different levels.
- select appropriate mechanisms to address issues and improve provider and integrator performance.
- apply audit and compliance mechanisms.
- apply all SIAM® practices of the Discovery ; Strategy stage.
- apply all SIAM® practices of the Plan ; Build stage.
- apply all SIAM® practices of the Implementation stage.
- apply all SIAM® practices of the Run ; Improve stage.
