

Microsoft 365 Power BI Level 2

Duration: 1 Day Course Code: M365PBIL2

Overview:

With PowerBI Desktop, you get a report authoring tool that enables you to connect and query data from different sources using the Query Editor. From the datasets you build with Query Editor you can add visualisations and create reports. Reports can then be published.

Target Audience:

The course builds on the skills learnt in our Power BI Fundamentals course and introduces you to more features including data modelling, performance optimization and more complex reporting. Please note that this course does not cover PowerBI Pro, PowerBI accessed via Microsoft 365 or SharePoint Services.

Objectives:

- By actively participating in this course, you will learn about the following:
 - Data Modelling
 -
 - Create Calculation using DAX
 - Perform in-depth Reporting
 -
-

Prerequisites:

We recommend that you attend our [Power BI Fundamentals](#) course or have equivalent skills and knowledge.

Software Requirements for Virtual Classroom

Delegates will need to have an Office 365 subscription with access to Power BI **and** have the desktop version installed on their PC. We strongly recommend that delegates also check that their PC meets the *Minimum Requirements* as outlined on the [Microsoft Website](#) in order to run Power BI effectively.

This course is not suitable for MAC users.

Content:

Data Modelling	Create Calculations using DAX	
Introduction to Data Modelling	Create Calculated Columns	Import a Custom Visual
Joins, Relationships and Cardinality	Build Quick Measures	Interactions and Drill-throughs
Many to Many Relationships	Use DAX to Build Quick Measures	Configure Conditional Formatting
Star Schemas	Join Types	Apply Slicing, Filtering and Sorting
Create a Date Table	Reporting	Key Perform and Indicators
	Choose Effective Visualizations
