

ServiceNow Customer Service Management (CSM) Fundamentals

Duration: 3 Days **Course Code: SNCSMF**

Overview:

Learn the basics of Customer Service Management (CSM) on the ServiceNow platform.

In this 2-day interactive course attendees master the usage of the ServiceNow Customer Service Management (CSM) application. This course is designed for Administrator's responsible for managing the Customer Service Management application.

Through a combination of lecture, group discussions, lab work, and simulated environment, participants explore the core concepts and features of ServiceNow Customer Service Management (CSM) application and perform Administrative functions in their own instance.

During this two-day, interactive training course, students access the ServiceNow platform in their own student instance, which is a "safe sandbox" loaded with demo and test data.

The class uses a fictitious company and different personas throughout course to present real world scenarios with relevant demonstrations and lab exercises. The class features lecture and group discussions, as well as extensive hands-on practice and reinforcement delivered in a variety of labs and simulated environment.

Target Audience:

Customer Service Manager, Customer Service Application Administrator, ServiceNow System Administrator, Technical Consultants and Administrators who will be configuring, developing or supporting the CSM applications

Objectives:

- **After you complete this course you will be able to:**
 - Explore the Customer Service Management application, related applications in the ServiceNow platform, use cases and architecture
 - Manage core Customer Service data such as Case, and case types, Consumers, accounts, account relationships and account hierarchies, Contacts, contact relationships, account teams and responsibility definitions, Contracts, entitlements, and service level agreements (SLA's), Assets, service-aware install base, Configure case forms and state flows, CSM agent workspace and advanced work assignment, Case and account escalation, and major issue management
 - Explore Reporting and Performance Analytics
 - Create Targeted Communications and Special Handling Notes
 - Investigate other key process applications including the Customer and Consumer Service Portals, and Communities
 - Explore Customer Service Management with Service Management
-
