
IBM DS8000 Implementation Workshop for System z

Duration: 3 Days **Course Code: SSF1G** **Delivery Method: Virtual Learning**

Overview:

To learn the DS8000 storage subsystem and its hardware components and logical structure. The students configure the DS8000 storage subsystem using a DS8000 Storage Manager GUI and review the DS CLI interface for scripting configuration functions.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is for Information Technology (IT) storage administrators responsible for the implementation of storage resources in an SAN environment with hardware solutions and operating systems.

Objectives:

- Describe the hardware components of the IBM TotalStorage DS8000
 - Describe the architecture of the IBM TotalStorage DS8000
 - Describe the terminology and virtualization concepts for DS8000
 - Describe the DS CLI interface installation and setup
 - Describe the DS CLI interface commands and how to use them
 - Describe the SSPC installation and setup
 - Describe the DS Storage Management GUI interface installation and setup
 - Describe the DS Storage Management GUI and how to use the panels to configure the DS8000 subsystem
 - Describe the use and configuration of LPARs in the DS8000
 - Describe the zSeries host attachment considerations for the DS8000
 - Describe the DS8000 Copy Services interfaces
 - Describe performance and tuning for DS8000
 - Describe the use of TPC for the DS8000
-

Prerequisites:

Students should:

- Complete Introduction to Data Storage Subsystems (SS05G)
 - Complete Storage Management Fundamentals (SS06AGB)
 - Have an understanding of DASD and data sets and how client hosts access data directly or through FICON channels
-

Content:

- Unit 1 - Unit 7
-
