

PHP & MySQL for Web Development

Duration: 2 Days **Course Code: PHPMWD** **Delivery Method: Virtual Learning**

Overview:

The PHP & MySQL for Web Development course is designed to give delegates the knowledge to develop/maintain HTML/PHP code that utilises the MySQL Database system.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

UNIX and Windows Users, Web Developers and Programmers wishing to create web based systems utilising PHP and MySQL.

Objectives:

- On completion of the PHP & MySQL for Web Development course the delegate will have a good practical knowledge of how to write successful HTML/PHP code utilising a MySQL database.
-

Follow-on-Courses:

- Apache Web Server (APH)
 - Perl Programming (PERL)
 - Python Programming 1 (PYP1)
 - Ruby Programming (RUBYP)
 - Ruby on Rails (RUBYR)
-

Content:

PHP ; MySQL for Web Development Training Course

Course Contents - DAY 1

Course Introduction

- Administration and Course Materials
- Course Structure and Agenda
- Delegate and Trainer Introductions

Session 1: PHP CONFIGURATION

- Working with External Files
- Error Reporting
- Interacting with External Programs

Session 2: BASIC SQL STATEMENTS

- Creating Databases and Tables
- Inserting Data into Tables
- Viewing Tables
- UPDATE
- Drop

Session 3: CONNECTING TO MySQL

- mysqli_connect
- mysqli_error
- Die

Session 4: USING PHP TO PERFORM DATABASE FUNCTIONS

- Inserting Data into a Database
- Creating Queries
- Executing Queries
- Processing the Returned Query Data
- Updating the DatabasePHP ; MySQL for Web Development Training Course

Course Contents - DAY 2

Session 5: GENERATING HTML USING PHP

- PHP Inside HTML
- HTML Form with Embedded PHP
- Multiple HTML Pages/Forms with PHP

Session 6: EMAIL AND COOKIES USING PHP

- Generating Email using PHP
- Generating Cookies using PHP
- Using Cookies

Session 7: PHP AND DATABASE SECURITY

- Designing Databases
- Connecting to Database
- Encrypted Storage Model
- SQL Injection
- Security Techniques
- Error Reporting
- User Submitted Data
