

Solaris Advanced Shell Programming Tools

Duration: 3 Days **Course Code: SASP** **Delivery Method: Virtual Learning**

Overview:

This Solaris Korn Shell Programming training course is designed to give delegates practical experience using a range of Solaris tools to manipulate text and incorporate them into Solaris shell scripts.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Programmers, developers and system administrators who need to construct shell scripts and process text files using advanced text handling facilities.

Objectives:

- To provide the knowledge and skills to make effective use of a wide range of standard Solaris programming and development tools.
-

Prerequisites:

The Solaris Advanced Shell Programming Tools course assumes knowledge of the Solaris Operating System to the level covered in the Solaris Introduction course. Knowledge of Solaris Shell Programming to the level covered on the Solaris Shell Programming course is also a requirement. Alternatively, relevant experience of UNIX or Linux servers is required.

Follow-on-Courses:

- Solaris 10 System Administration - Part I (SSA1)
 - Oracle SQL (OSP)
-

Content:

Solaris Advanced Shell Programming Tools
Training Course Course Contents - DAY 1

Session 1: BACKUP AND RESTORE UTILITIES

- Backing-up and restoring files
- Basic and advanced use of tar
- Compression utilities gzip,bzip2,zip and compress
- Exercise: Backing up and restoring files using tar
- Exercises: Compressing files

Session 2: BACKGROUND JOB SCHEDULING

- Scheduling jobs with the cron command
- Scheduling jobs with the at command
- Exercises: Running background jobs

Session 3: COMMANDS FOR COMPARING FILES

- Compare two files with the cmp command
- Compare two files with the comm command
- Compare two files with the diff and sdiff commands
- Compare large files with the bdiff command
- Exercises: Identifying file differences

Session 4: SPLITTING FILES

- The split and csplit commands
 - Exercises: Splitting files
- Solaris
Advanced Shell Programming Tools
Training Course Course Contents - DAY 2

Session 5: IDENTIFYING AND TRANSLATING CHARACTERS

- od - octal dump
- Use cat to display non-printing characters
- The expand and unexpand commands to convert between tab and space characters
- The tr command for character translation
- Exercises: Translating characters with tr

Session 6: REGULAR EXPRESSION NOTATION REVIEW

- Standard regular expressions
- Extended regular expressions

Session 7: THE STREAM EDITOR sed

- sed command line syntax
- sed script files
- sed command processing
- sed addresses and simple instructions
- sed pattern space and hold space
- Grouping sed commands
- Hold and get functions
- Advanced flow control
- Exercises: Text processing with sed

Session 8: FUNDAMENTALS OF AWK

- Basic AWK usage
 - AWK program-files
 - AWK scripts
 - AWK variables
 - Pattern matching with AWK
 - AWK extended patterns
 - AWK operators
 - AWK arithmetic operations
 - AWK output
 - Formatting output with printf
 - Exercises: Create awk scripts to extract selected data from a file and generate reports
- Solaris Advanced Shell
Programming Tools Training Course
Course Contents - DAY 3

Session 9: AWK PROGRAM CONTROL STRUCTURES

- The BEGIN and END functions
- The AWK if construct
- The AWK else if construct
- The AWK while construct
- Other program control statements
- The AWK break,continue and exit statements
- User defined functions
- Exercises: Create AWK scripts and program-files utilising program control structures

Session 10: AWK FUNCTIONS

- AWK string functions
- AWK length,tolower,toupper,index,sub,gsub,match,substr,split,sprintf,system and getline functions
- Exercises: Generate AWK scripts and program-files to extract and format data using AWK functions

Session 11: AWK ARRAYS

- AWK associative arrays
- Multi-dimensional arrays
- Exercises: Create AWK associative arrays to process text files and generate reports

Session 12: MISCELLANEOUS TOOLS

- bc (calculator)
- fuser (testing for files in use)
- getopts (checking options passed to shell scripts)
- printf (formatting screen output)
- logger (script logging)
- xargs (generating arguments for a command)
- eval (re-evaluating variables)
- Exercises: Using tools within a shell script
