

IMS High Availability Large Database (HALDB)

Duration: 1 Day **Course Code: CM46G** **Delivery Method: Virtual Learning**

Overview:

Learn about the Information Management System (IMS) High Availability Large Database (HALDB). Examine how databases may be migrated to HALDB and the advantages of using HALDB.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This is an intermediate course for IMS database administrators, who implement and manage HALDB.

Objectives:

- Define HALDB databases and their partitions
- Migrate databases to the use of HALDB
- Understand database administrator responsibilities in managing HALDB
- Understand application design for HALDB
- Develop procedures for the support and recovery of HALDB

Prerequisites:

You should complete:

- Physical Organization of Databases (CM220) **or**
- Physical Organization of Databases - Web (CMW22)
- or have equivalent work experience.

You should have:

- working knowledge of IMS full function databases
- database administrator responsibilities for their support.

Content:

- | | | |
|-----------------------|-----------------------------------|---------------------------------|
| ■ Overview | ■ Database Commands | ■ Application and Miscellaneous |
| ■ Database Structures | ■ Utilities | Considerations |
| ■ Definition | ■ Database Creation and Migration | ■ HALDB Online Reorganization |
| ■ Partition Selection | ■ Changing Databases | ■ Summary |
| ■ DBRC Support | ■ Secondary Indexes | |
