IBM Turbonomic Administration

Duration: 2 Days   Course Code: TN902G   Delivery Method: Virtual Learning

Overview:

This intermediate-level course explains the IBM Turbonomic approach and capabilities to assure application performance and manage the entire application stack. In this hands-on course, students learn how to configure IBM Turbonomic instance, add targets as well as create automation, placement, and parking policies to align with business goals. Learn how to run plans for capacity management as well as access reports to show the business value of Turbonomic actions.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

DevOps, Consultants, System Administrators, Operators, Users

Objectives:

- After completing this course, you should be able to:

- Apply a license to their IBM Turbonomic instance

- Add targets to their IBM Turbonomic instance

- Add and configure users in IBM Turbonomic

- Create groups using various criteria for enhanced context

- Automate placement and scaling actions

- Stop or start cloud resources using parking policies

- Explain how scaling constraints affect scaling actions

- Run plans for capacity management and interpret results

- Access reports to show the business value of Turbonomic actions

Prerequisites:

Content:

Units:

Unit 1: Target configuration

Unit 2: User management

Unit 3: Creating groups

Unit 4: Automation and parking policies

Unit 5: Placement policies

Unit 6: Optimization and rightsizing

Unit 7: Capacity planning

Unit 8: Application mapping

Unit 9: Maintenance options

Unit 10: Reporting in IBM Turbonomic
