

IBM Storage Protect Plus 10.1.8 Implementation and Administration

Duration: 4 Days Course Code: TSP13G Delivery Method: Virtual Learning

Overview:

In this four-day course, you learn about installation, configuration and administration of IBM Spectrum Protect Plus v10.1.8. This begins with a review of the software features and functions, and the basic requirements, including architecture and data movement, and upgrade of the various components. Then, through lecture and hands-on labs, you learn how to deploy an environment as a virtual appliance or as a set of containers. You add providers and create customized SLA policies with options. You associate providers with policy to protect data in file systems and virtual machines, a variety of applications and databases, and Kubernetes and OpenShift containers. You configure and manage user access to the system and to the providers you protect. You manage jobs, plan and prepare for disaster recovery, view log files for monitoring and troubleshooting, and create custom reports.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Implementers and administrators who are protecting virtual environments, containers and applications in a hybrid cloud environment

Objectives:

- Describe features and functions, and use the sizer tool
- Install and configure the server, vSnap, VADP proxy, and configure SLA Policies
- Protect virtual machines
- Protect databases and applications
- Protect data in containers and on physical systems
- Perform tasks necessary for disaster recovery
- Archive data for long-term retention and regulatory compliance
- Manage daily operations and troubleshooting
- Manage daily operations and troubleshooting

Prerequisites:

- Experience with data protection
- Familiarity with Windows and Linux operating systems
- Some experience with virtualization, cloud storage, and containerized workloads
- An understanding of IBM Spectrum Protect administration

Content:

- | | | |
|--|--|--|
| ■ Unit 1: IBM Spectrum Protect Plus introduction | ■ Unit 4: Application protection | ■ Unit 7: Disaster recovery |
| ■ Unit 2: Installation and configuration | ■ Unit 5: Container and file system protection | ■ Unit 8: Daily operations, maintenance, and reporting |
| ■ Unit 3: Data protection for virtual machines | ■ Unit 6: Long-term retention | |
