

Advanced Intelligent Document Processing with IBM Watson Discovery

Duration: 1 Day **Course Code: W7L152G**

Overview:

Advanced Document Search with IBM Watson Discovery explores intelligent document processing at a deeper level. You learn how to create regular expressions, import rule-based models, customize query results, conduct web crawling, and teach the domain language to Watson Discovery to enhance the relevance and accuracy of your results.

Target Audience:

AI specialists who know natural language processing at an intermediate level

Objectives:

- Get data through a web crawl
- Import an existing Smart Document Understanding model to collections
- Apply Teach Domain concepts
- Improve the model performance by using the improve relevance function
- Import rule-based models from Watson Knowledge Studio to Watson Discovery
- Illustrate previewing the application
- Create a Conversation Search project with existing collections

Prerequisites:

Before taking this course, you should have at least:

- Intermediate knowledge of Watson Discovery
 - Natural Language and Processing fundamentals
- Experience with Watson Knowledge Studio is not required, but it is recommended to have it at an intermediate level.
