VMAX3 Business Continuity Management

Duration: 2 Days   Course Code: VMAXBCM   Delivery Method: Virtual Learning

Overview:

This specialist level course provides the knowledge required to deploy and manage VMAX3 array-based local and remote replication solutions for business continuity needs. Operational details and implementation considerations for EMC TimeFinder SnapVX and Symmetrix Remote Data Facility (SRDF) are covered. Lessons include considerations for performing local and remote replication operations in physical and virtualized environments. Hands-on lab exercises using Symmetrix Command Line Interface (SYMCLI) and Unisphere for VMAX provide the opportunity to learn and validate the material covered in the lectures. Lab exercises will be performed in physical (Sun Solaris and Windows 2008) and virtualized (VMware ESXi) hosts attached to VMAX3 arrays.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is intended for EMC Personnel, EMC Partners and EMC Customers who will be involved in implementing and managing local and remote replication solutions for Business Continuity using TimeFinder and SRDF in an Open Systems environment.

Objectives:

- **Upon successful completion of this course, participants should be able to:**

- Describe and perform TimeFinder SnapVX operations with SYMCLI and Unisphere for VMAX – in physical and virtualized environments

- Describe and perform SRDF operations in Synchronous (SRDF/S) and Asynchronous (SRDF/A) modes using SYMCLI and Unisphere for VMAX – in physical and virtualized environments

Prerequisites:

Windows and/or Unix operating systems; ability to utilize host based GUI and/or command line interfaces to perform hands-on labs

- VMAX3 Fundamentals
- VMAX3 Local Replication Fundamentals
- VMAX3 Remote Replication Fundamentals
- VMAX3 Configuration Management
- VMware vSphere

Content:

The content of this course is designed to support the course objectives.

Module – TimeFinder SnapVX operations

- Lesson – TimeFinder SnapVX concepts and operations
- Lesson – TimeFinder SnapVX operations in a virtualized environment – Replicating a VMFS Datastore
- Lesson – TimeFinder SnapVX operations in a virtualize environment – Replicating a VM accessing RDM Hard Disks
- Lesson – TimeFinder SnapVX operations using Unisphere for VMAX

Module – SRDF/Synchronous operations

- Lesson – SRDF Initial setup operations
- Lesson – SRDF Disaster Recovery operations
- Lesson – SRDF Decision Support/Concurrent operations
- Lesson – SRDF/S for VMFS Datastore Disaster Recovery
- Lesson – SRDF/S Disaster Recovery for a VM accessing RDM Hard Disks
- Lesson – SRDF Operations using Unisphere for VMAX

Module – SRDF/Asynchronous operations

- Lesson – SRDF/A concepts and operations
- Lesson – SRDF/A Resiliency features
- Lesson – SRDF/A Multi-session Consistency (MSC)
