## VPLEX Management

**Duration: 3 Days**    **Course Code: VPLEXMGMT**    **Delivery Method: Virtual Learning**

---

### Overview:

This course provides the learner with an in-depth understanding of how to manage, monitor and maintain the operational aspects of VPLEX systems (Local and Metro) using Unisphere for VPLEX and the VPLEX CLI. Provisioning storage from both the local and remote clusters are topics covered in lecture and labs. Distributed volumes and working with Consistency Groups are discussed and practiced. Protecting VPLEX Virtual Volumes with RecoverPoint is covered, along with the MetroPoint feature. Monitoring a VPLEX System is also covered using both lecture and lab exercises. This course covers version 5.4

### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

---

### Target Audience:

This course is intended for any person who presently or plans to manage a VPLEX solution.

---

### Objectives:

- **Upon successful completion of this course, participants should be able to:**
  - Describe common VPLEX terms, configuration options, hardware and software architecture
  - Describe high level data flow within a VPLEX system.
  - Create Virtual Volumes and provision them to Hosts
  - Create and Manage VPLEX Distributed Devices
  - Manage VPLEX using Unisphere and CLI
  - Perform volume expansion or migration
  - Protect VPLEX Devices with RecoverPoint
  - Perform Monitoring in VPLEX including batched mobility.
- 

### Prerequisites:

**To understand the content and successfully complete this course, a student should have knowledge and skills associated with the following:**

- Storage Area Network (SAN) concepts
  - IP networking basics
  - EMC SAN implementation and Connectrix switch administration
  - Storage provisioning procedures with EMC arrays
  - Basic familiarity with host operating systems: Windows, VMwar
-

## Content:

The content of this course is designed to support the course objectives.

- VPLEX Product and Technology Details
- VPLEX Storage Provisioning
- Provisioning Remote Access with VPLEX
- VPLEX Distributed Devices

Monitoring

---
