

Introduction to 802.1X Operations for Cisco Security Professionals

Duration: 3 Days Course Code: 8021X Version: 3.0 Delivery Method: Company Event

Overview:

The **Introduction to 802.1X Operations for Cisco Security Professionals (802.1X)** training teaches you to manage Cisco IBNS with Catalyst switches, 9800 Controllers, and Meraki.

The Introduction to 802.1X Operations for Cisco Security Professionals (802.1X) training shows you how to configure and prepare to deploy Cisco® Identity-Based Networking Services (IBNS) solutions based on Cisco Catalyst switches, Cisco 9800 LAN Controllers, and Cisco Meraki deployments. You will learn the fundamentals of the 802.1X protocol and configuration, Cisco IBNS, configuring access for non-suppliant devices, architectural components, and considerations with 802.1X. This training also earns you 12 Continuing Education (CE) credits toward recertification.

Updated 11/06/2026

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

This class is intended for the following participants:

- Security Administrators
- Security Consultants
- Network Administrators
- System Engineers
- Technical Support Personnel
- Channel Partners and Resellers

Objectives:

- | | |
|---|--|
| ■ This course will help you: | ■ Configure Cisco Wireless LAN Controllers for 802.1X access |
| ■ Identify Cisco IBNS operation and how 802.1X functions as part of the IBNS solution | ■ Configure Meraki devices for 802.1X access |
| ■ Compare the different types of EAP authentication to select the best method for a solution deployment | ■ Apply MAB and guest services to integrate devices without direct 802.1X support to the network |
| ■ Configure Cisco Catalyst switches for 802.1X access | ■ Explain network design considerations and troubleshooting for Cisco IBNS |

Prerequisites:

There are no prerequisites for this training. However, the knowledge and skills you are recommended to have before attending this training are:

- Basic routing and switching knowledge
These skills can be found in the following Cisco Learning Offering:
- CCNA - Implementing and Administering Cisco Solutions

Follow-on-Courses:

- SISE - Implementing and Configuring Cisco Identity Services Engine

Content:

Course Outline

- Introduction to Cisco IBNS
- 1X EAP Authentication
- 1X on Cisco Catalyst Switches
- 1X on Cisco Wireless LAN Controllers
- 1X on Meraki Devices
- Network Access for Non-Supplicant Devices
- Design Considerations and Troubleshooting for Cisco IBNS Networks

Lab Outline

- Configure an 802.1X Supplicant for Tunneled EAP (TEAP)
- Configure Cisco Catalyst Switch for IEEE 802.1X
- 1X Configuration on Cisco Wireless LAN Controllers
- 1X Configuration on Meraki Devices
- Configure MAC Authentication Bypass on Cisco Network Devices
- Troubleshoot Cisco IBNS Networks

Additional Information:

Official course book provided to participants.”
