
IBM InfoSphere Information Governance Catalog v11.5.0.2: Building the Catalog

Duration: 1 Day Course Code: KM615G

Overview:

In this course students learn how the Information Governance Catalog is used to govern information assets through the development of a governance catalog of categories and terms. This catalog documents information assets and governance policies and rules that implement the high-level strategy and objectives of a governance program.

Target Audience:

This is a basic course for those who will be using the Information Governance Catalog to develop and implement their information governance strategy.

Objectives:

- Please refer to course overview
-

Prerequisites:

Those taking this course should have basic knowledge of the Windows operating system. Familiarity with Information Server products is desirable but not required
