

Certified Information Security Manager (CISM)

Duration: 4 Days Course Code: CISM Delivery Method: Virtual Learning

Overview:

CISM® is the most prestigious and demanding qualification for Information Security Managers around the globe today. This qualification provides you with a platform to become part of an elite peer network who have the ability to constantly learn and relearn the growing opportunities/ challenges in Information Security Management.

Our CISM exam preparation course provides an in-depth coverage of contents across the Four CISM domains with a clear focus on building concepts and solving ISACA released CISM exam questions. The course is an intense training and hard-core exam preparation for ISACA's Certified Information Security Manager (CISM®) Examination.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Security professionals with 3-5 years of front-line experience; Information security managers or those with management responsibilities; Information security staff, information security assurance providers who require an in-depth understanding of information security management including: CISO's, CIO's, CSO's, privacy officers, risk managers, security auditors and compliance personnel, BCP / DR personnel, executive and operational managers responsible for assurance functions.

Objectives:

- Use the knowledge gained in a practical manner beneficial to your organisation
